

Amendments to the Specification:

Please replace the four paragraphs on page 1 (up to and including line 12 of page 1 of the application as filed) with the following amended paragraphs:

**PRESSURE PACKAGE SYSTEM**

**Title: TECHNICAL FIELD**

This application relates to a pressure Pressure package system for applying a working pressure to a fluid included in a pressure package.

**CROSS-REFERENCE TO RELATED APPLICATIONS**

This application is the national stage of international application no. PCT/IB2004/000160, filed 20 January 2004, and claims priority to Dutch application no. NL1022456, filed 21 January 2003. This application is also related to international application no. PCT/IB2004/000162, filed 20 January 2004. Each of these applications is incorporated by reference herein.

**BACKGROUND**

The invention relates to a pressure package system for providing a working pressure on a fluid included in a pressure package, the system being provided with a pressure package in which a product chamber is included for holding the fluid and in which a working pressure chamber is included for keeping a propellant at the working pressure, the system being further provided with a pressure controller and a high-pressure chamber connected with the pressure controller for keeping the propellant in supply at a relatively high pressure, the system being further arranged to supply the propellant from the high-pressure chamber to the working pressure chamber with the aid of the pressure controller on the basis of a reference pressure, for maintaining the working pressure in the working pressure chamber.

Please add the following new heading **after** the paragraph ending at page 3, line 12:

Applicant : Roland Frans Cyrille Cornelius Vanblaere  
et al.
